About Me

Final-Year BSc (Hons) Software Engineering undergraduate and AI Engineer with hands-on experience building scalable full-stack and AI-integrated applications. Skilled in designing and deploying LLM-powered agentic systems, RAG pipelines, and fine-tuned models for real-world production use cases. Strong foundation in system design, RESTful architectures, and cloud-native development. Comfortable working across the full ML lifecycle — from data preprocessing and model training to evaluation, deployment, and monitoring.

Soft Skills

Leadership, Creativity, Teamwork, Problem Solving, Communication, Adaptability, Critical Thinking, Time Management, Attention to Detail, Analytical Thinking, Collaboration, Fast Learner, Decision Making, Self-Motivation

Other

- Member of SLTC Research Lab
- Article Publishment on Sunday Times
- International Judo Player
- Tabla Visharad

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, C, Dart
- **Web Development:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap
- **Mobile Development:** Flutter, React Native
- **UI/UX Design:** Figma, Adobe XD, Framer
- **AI & ML:** TensorFlow, PyTorch, Scikit-learn, Prompt Engineering, RAG, Model Fine-Tuning, Embeddings, NLP
- **LLM & Agentic Tooling:** LangChain, LangGraph, LlamaIndex, OpenAI API, Anthropic API, Hugging Face, Vector Databases (Pinecone, ChromaDB, FAISS)
- **MLOps & Deployment:** Model Serving, CI/CD for ML, Docker, Kubernetes (basics), Monitoring & Evaluation Pipelines
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Docker, GitHub Actions, Linux, CI/CD
- **Databases:** MySQL, Firebase, MongoDB, Vector Databases
- **Concepts:** Agentic Systems, AI Integration, API Design, System Design, Microservices, OOP, DSA, Agile, Unit & Integration Testing

Experience

AI Engineer — 2026 Jun 1 - Current
AbsolX Core AI

Junior Software Engineer — 2025 Feb - 2026 Jul 31
CodeGen International (Sri Lanka, UK)

Junior Software Engineer / Full Stack Developer / UI/UX — 2024 Jul - 2025 Mar
AbsolX Core AI

Full Stack Developer — 2024 Feb - 2024 Jul
Adventa Pvt Ltd (Australia, Remote)

Software Developer — 2023 Sept - 2024 Feb
Dodget Lawyer (Bangladesh, Remote)

Full Stack Developer — 2022 Aug - 2023 Aug
Codex Harbor

Education

BSc (Hons) in Software Engineering — 2022 - Present
SLTC Research University

Diploma in Information Technology — 2023 - Present
University of Hertfordshire, UK

G.C.E. A/L (Maths Stream) — 2018 - 2020
St. Joseph's Girls' College

Projects

- **AI-Powered Career & Resume Intelligence Platform:** Full-stack platform where users upload their CV and a target job description; scores the match, highlights strengths/gaps, recommends skills, and offers role-specific practice quizzes.
- **Multi-Agent Workflow Automation System:** Coordinated multi-agent LLM system with chatbot integration for automating multi-step workflows.
- **Information-Retrieving Agent (RAG):** Agentic system that ingests documents, indexes them in a vector store, and answers natural-language queries with source attribution; extended with LangChain/LangGraph for rule-based routing.
- **AI Content Difficulty Classifier — Final Year Research Project:** Independently trained an ML model that ingests uploaded learning material (text, image, video), chunks it, and assigns a difficulty score to each chunk.
- **IoT Smart Attendance System:** Bluetooth-based system for automated attendance marking.
- **Client Web & Mobile Projects:** Salon booking apps/websites, e-commerce sites, and CRM system design and development (front-end and back-end) delivered for external clients.
